** Outstanding participation: Awarded as the participant with the best ability to design and implement smart contracts.

ABOUT ME

I'm a dedicated developer with a passion for creating innovative and impactful solutions.

My career journey includes experiences in broad roles such as financial operations, customer support, project management, and people leadership. While working in a fintech environment, I recognized the potential for technology to drive innovation and results, leading me to pursue a new career in web development. As a Web3 enthusiast, I have developed my skills focusing in Smart Contracts and Frontend development.

EXPERIENCE

Web Developer

H3aven – Remote, United States – 2023

- Front end development and testing using React, CSS libraries, backend integration and data fetching (GraphQL).
- Smart Contract development and testing using Solidity, Hardhat and The Graph Protocol.
- API development using Node.js and Serverless Framework.

Accounts Receivable Leader

Stone – Sao Paulo, Brazil – 2019 -2022

- Established an accounts receivable department, developing new processes and integrating group companies into centralized financial processes.
- Managed the implementation of tools with internal technology teams and external vendors.
- Organized the team during a large M&A process to fit the new company structure.
- Led projects and managed the team, including performance metrics, evaluation, compensation, and feedback.

Financial Operations – CS Leader

Stone – Sao Paulo, Brazil – 2018 - 2019

- Managed a team of customer service agents, addressing critical financial operations cases.
- Coordinated payment incidents between financial entities and internal technology teams.
- Oversaw team management, including performance metrics, personnel, evaluation, compensation, and feedback.

Financial Operations Analyst (*Stone – Sao Paulo, Brazil - 2018*)

Engineering Assistant (*Lima Construções – Recife, Brazil – 2016 – 2017*)
